

Write a program on datagram socket for client/server to display the messages on client side, typed at the server side.

UDP Client

```
import java.io.*;
import java.net.*;
class ucl
{
    public static void main(String args[]) throws Exception
    {

        BufferedReader clientRead =new BufferedReader(new InputStreamReader(System.in));
        DatagramSocket clientSocket = new DatagramSocket();
        InetAddress IP = InetAddress.getByName("127.0.0.1");
        byte[] sendbuffer = new byte[1024];
        byte[] receivebuffer = new byte[1024];
        System.out.print("\nClient: ");
        String clientData = clientRead.readLine();
        sendbuffer = clientData.getBytes();
        DatagramPacket sendPacket =
        new DatagramPacket(sendbuffer, sendbuffer.length, IP, 9876);
        clientSocket.send(sendPacket);
        DatagramPacket receivePacket =
        new DatagramPacket(receivebuffer, receivebuffer.length);
        clientSocket.receive(receivePacket);
        String serverData = new String(receivePacket.getData());
        System.out.print("\nServer: " + serverData);
        clientSocket.close();
    }
}
```

UDP Server

```
import java.io.*;
import java.net.*;

class usr
{
    public static void main(String args[]) throws Exception
    {
        DatagramSocket serverSocket = new DatagramSocket(9876);
        byte[] receivebuffer = new byte[1024];
        byte[] sendbuffer = new byte[1024];
        while(true)
```

```
{
    DatagramPacket recvpkt = new DatagramPacket(receivebuffer, receivebuffer.length);
    serverSocket.receive(recvpkt);
    InetAddress IP = recvpkt.getAddress();
    int portno = recvpkt.getPort();
    String clientdata = new String(recvpkt.getData());
    System.out.println("\nClient : "+ clientdata);
    System.out.print("\nServer : ");
    BufferedReader serverRead = new BufferedReader(new InputStreamReader (System.in) );
    String serverdata = serverRead.readLine();
    sendbuffer = serverdata.getBytes();
    DatagramPacket sendPacket = new DatagramPacket(sendbuffer, sendbuffer.length, IP,portno);
    serverSocket.send(sendPacket);
}
}
}
```
